DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to a method for applying to a root-canal instrument.

Group II, claim(s) 2-8, drawn to a device.

Group III, claim(s) 9, drawn to a cartridge.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of the Group I invention is a method of applying filling material to a root-canal instrument, the special technical feature of the Group II invention is a device with means to allow a cartridge to be brought up to and maintained at a desired temperature, and the special technical feature of the Group III invention is a cartridge with means of sealed closure. Since the special technical feature of Group I is not present in Groups II and III and the special technical feature of Group II is not present in Group III, the groups of invention must be restricted.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A of Figure 1

Species B of Figure 4.

If applicant elects Group II, applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner: Species A, claim 3 and Species B, claims 4-8.

The following claim(s) are generic: claim 2.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the special technical feature of Species A is a heat-conducting heating body heated by means of a resistive electric element and the special technical feature of Species B is a removable pot. Since the special technical feature of Species A is not contained in Species B, the species of Group II must be restricted.

6. A telephone call was made to Gary Cohen on April 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
